Numanhan Duran

ND

Software Developer

ABOUT ME

I have been actively involved in software development since 2017. I gained experience in many international and domestic jobs. My goal is to get a good point in both business management and software, and I want to take part in jobs that increase and protect brand value.

SUMMARY

Throughout my university life, I aimed to develop and produce myself, organizing studies in many fields and acted with teams. I tried to be at a global level by establishing connections from both domestic and abroad. I organized works with my contacts in England, Russia and Spain. I have gained experience in both software field and management and business field. My life motto is all about learning and developing. I love being an entrepreneur and producing ideas and working is a great source of pleasure for me. Thank you.
